

Upgrade your HFOV experience

Bird™ Sentry 2 High Flow Blender combined with the 3100 HFOV

Combining the Bird™ Sentry 2 High Flow Blender with your 3100 high frequency oscillatory ventilator (HFOV) is made possible by simply adding the blender bracket assembly, resulting in both oxygen administration and monitoring while adding the availability of an auxiliary flow meter.

The new Bird Sentry 2 High Flow Blender features:

- Smart alarm settings that are customized to the individual patient
- Intuitive design to facilitate staff training by our dedicated HFOV clinical team
 - Bleed control—to minimize gas consumption
 - Large, backlit LCD—providing clarity in low-light environments
 - Backlit acrylic flow meter
 - DC power port for optional, external power supply
- Two-year warranty*

* Reference the operator manual for full warranty details.
