SuperNO₂VA™
nasal PAP ventilation device

The SuperNO₂VA™ device is designed to:

- Pre-oxygenate
- Relieve upper airway obstruction due to decreased level of consciousness
- Maintain ventilation
- Rescue ventilate
- Ease access for intra-oral procedures
- Be used peri-operatively

The SuperNO₂VA™ system, which includes the device, 2L hyperinflation bag and other accessories, delivers positive pressure while providing access to the oral cavity.
Effective airway management

Competitive advantage

Confident maintenance of perioperative airway patency

**PRE-OP**
- Used to maintain O₂ saturation

**INTRA-OP**
- Deep sedation and intra-oral
- Provides positive pressure in the PACU

**POST-OP**
- EGD/TEE; colonoscopy, bronchoscopy, fiberoptic intubation, laryngoscopy, MRI
