PocketPEP®
oscillating positive expiratory pressure device

Designed by clinicians for clinicians and their patients

The PocketPEP® is a handheld OPEP device for lung expansion and promotes secretion clearance. PocketPEP® creates oscillating positive expiratory pressure when the patient exhales through the device, helping to loosen and remove bronchial secretions associated with:

- Pulmonary emphysema
- Chronic Obstructive Pulmonary Disease (COPD)
- Atelectasis
- Chronic Bronchitis
- Bronchiectasis
- Cystic Fibrosis
- Asthma
- Nonproductive cough
- Smoker’s cough

PocketPEP features and benefits:

- Smallest OPEP device available
- Adjustable resistance
- Home or hospital use
- Easy-to-clean and operate*
- Enables use of OPEP therapy at home, can reduce risk of pulmonary complications post discharge

*The PocketPEP version meets Cystic Fibrosis Foundation recommended cleaning guidelines1
PocketPEP specifications:

- Clean with soapy water, dishwasher, boiling or microwave steam bags¹
- T-piece adapts to most nebulizers and allows OxyJet compatibility
- Adjustable resistance
- PVC-free
- Not manufactured from natural rubber latex
- Single patient, multiple use device
