

Clinical Integration – As Smart as You

Clinical Integration Services –

We realize what you need

At Vyaire we take time to listen and to understand your exact needs. As a result we can provide a custom-made service containing a detailed project design with exact time and cost estimations. Each package is bespoke and tailored specifically to you. Your clinical integration project will include the following elements:

1. Analyzing – We listen to you.

Together we identify your needs regarding your workflow, reporting and data flow. We develop a dedicated plan for enhancing your lab to the SentrySuite world.

2. Planning – Designing your customized solution.

Once your preferred workflow is defined we combine our solutions and create your unique setup. Your tailored package includes dedicated workflow diagrams and data flow diagrams as well as logical and physical network plans.

3. Realization – Comprehensive Service Integration.

Our solution fits your needs – we will install all required elements via remote support or on-site if required.

4. Training – Gain User Acceptance.

Once your needs are fulfilled we will arrange training for clinical and technical staff to ensure they fully benefit from the new improved workflow – training is the key.

We are here for you all the way

Worklist
Manage your daily routines using our smart planning tools.

Clinical Research
Turn your data into meaningful conclusions – use your preferred statistical tool for further analysis.

Our Clinical Integration Services ...

- ... mean scalability, openness and modularity.
- ... allow maximum flexibility in interpreting your clinical results.
- ... build the platform for your holistic clinical research concept.
- ... support HL7, DICOM, GDT and many more.
- ... improve the efficiency of your daily routines the smart way.

Interpretation
Easily access your clinical PFT records over the web to review and interpret results from any location of your choosing.

Interoperability
Use your preferred protocol. Our solution supports everything – from HL7 and DICOM to customized web services.

SentryConnect
Integrates your PFT lab accurately into your local ICT environment. Extend your overall clinical workflow into the SentrySuite world.
