

## Vital Signs<sup>™</sup> invasive blood pressure care cables

### **Make the right connection with Vital Signs<sup>™</sup> invasive blood pressure (InvBP) care cables**

- Validated to work with a broad range of GE Healthcare equipment, our cables connect your patients to GE monitoring technologies.
- Premium materials, such as Valox<sup>™</sup> and Santoprene<sup>™</sup>, help reduce cable curling or tangling during use and storage.
- Slim profile connector, fish-tail molded strain relief, and parameter color-coding make the cables quick to connect.
- The molded-connector assembly is designed to improve cable flexibility and help avoid fluid ingress.

With connections for Utah/Biotrans™, ICU Medical Transpac-IV®, Edwards Lifesciences TruWave and Merit Medical Meritrans DTX Plus transducers, our InvBP cable offerings provide you with a breadth of options for invasive blood pressure transducer connectivity to GE Healthcare patient monitors.
