

Respiratory Consumables

catalog

Vyaire Medical Inc. is a global company focused exclusively on supporting breathing through every stage of life. Established from legacy brands with a 65-year history of pioneering breathing technology, the company's portfolio of integrated solutions is designed to enable, enhance and extend lives.

At Vyaire, we pledge to advance innovation and evolve what's possible to ensure every breath is taken to its fullest. Headquartered in suburban Chicago, Vyaire is recognized, trusted and preferred by specialists throughout the respiratory community worldwide.

AirLife arterial blood gas sampling family

AirLife™ lyophilized heparin arterial blood gas syringes and kits

Vyaire offers a comprehensive portfolio of arterial blood gas sampling options for protection and accuracy when you need it most. All AirLife blood samplers utilize lyophilized heparin to preserve blood sample integrity, which reduces risk of dilution errors that may be associated with liquid heparin. We offer a needle protection sheath that cores the bevel and encapsulates the contaminated needle and prevents blood spatter if dropped. The integral safety clips on the syringe allow for audible and visual confirmation that the needle is secure. Syringes are available non-vented or with a rear vented system which automatically evacuates air out the back of the syringe as the blood fills during the draw.

Reduced heparin syringes and kits

To help ensure the accuracy of ionized calcium results we offer reduced heparin to compensate for calcium binding. If you are measuring electrolytes as part of your blood gas analysis, choose these reduced heparin options for the most accurate results.

Cat. no.	Description	Qty.
ABG 3 mL syringes <i>Lyophilized reduced heparin = 7.9 I.U.</i>		
4022400	ABG 3 mL vented syringe, 22 gauge x 1" needle, luer lock, needle protection sheath	100

Vented vs. non-vented syringes can be easily distinguished by the color coded plunger tip. Dark green plunger tip on left is non-vented and light green plunger tips on right is vented.

Removing air from the equation

Air can compromise the blood sample, leading to erroneous results. The pre-set plunger integrates a rear venting system, which automatically evacuates air out the back of the syringe as the blood fills during the draw.

In the event of a short blood draw, you need an efficient way to remove the air left in the syringe. Coupled with the needle protection device, rear venting enables you to evacuate air bubbles without passing them through the blood sample. An integral media allows only the air to escape, and then expands and seals when contacted by blood.

Designed with clinicians in mind

The AirLife needle protection system provides you with an unobstructed view of the arterial flash indicating the needle has entered the artery. By using a needle protection device that may obstruct flash visibility, there is a risk of the needle passing through the artery—possibly subjecting the patient to another puncture.

With the AirLife needle protection system, you retain the freedom of drawing blood without needle protection devices that can get in the way.

The integral safety clips on the syringe allow for audible and visual confirmation that the needle is secure and cannot be removed from the AirLife needle protection system.

When it comes to needle coverage, the AirLife needle protection cores the bevel and encapsulates the contaminated needle following a blood draw. This helps eliminate the risk of blood splatter if the syringe is dropped. Once enclosed in the AirLife needle protection system, the needle is completely contained.

Bronchial hygiene

Incentive spirometers.....	11
vPEP®	11

AirLife™ volumetric incentive spirometers

Our AirLife volumetric incentive spirometers simplify deep breathing therapy with an intuitive design that prompts patients to correctly perform and monitor their own breathing exercises, even without direct supervision. A patient goal indicator can be adjusted and allows patients to monitor their own progress. Dual-sided calibrations clearly identify achieved volumes of up to 4,000 mL capacity. The flexible tubing lets the patient adjust the mouthpiece for use in various positions, and a mouthpiece holder provides storage when not in use. Available with or without a one-way valve.

Cat. no.	Description	Qty.

Non-Invasive Ventilation & High Flow Oxygen Therapy

NIV masks	13
High flow cannulas and heated circuits.....	14
NIV circuits	14

AirLife™ noninvasive masks

AirLife noninvasive ventilation (NIV) full face and nasal masks offer clinicians a reliable option, while providing patients comfort and security. The adjustable four-point headgear and flexible swivel connector enables ease in fit and adjustment. Masks feature a lightweight silicone design that contours to the patient's face for a comfortable fit, while the quick release clip eliminates the need to refit after removal. The odorless, easy-to-clean masks include both vented and non-vented options and are available in three sizes to fit a wide range of patients.

Cat. no.	Description	Qty.
Full face non-invasive masks		
NIV040S	NIV vented full face mask with anti-asphyxia valve-small	10/ea
NIV040M	NIV vented full face mask with anti-asphyxia valve-medium	10/ea
NIV040L	NIV vented full face mask with anti-asphyxia valve-large	10/ea
NIV041S	NIV non-vented full face mask -small	10/ea
NIV041M	NIV non-vented full face mask -medium	10/ea

NIV044M	NIV non-vented nasal mask with anti-asphyxia valve-medium	10/ea
NIV044L	NIV non-vented nasal mask with anti-asphyxia valve-large	10/ea

Key features

- Flexible swivel connector enables ease in positioning of the circuit
- Comfortable four-point headgear with crown strap for better stability and sealing
- Adjustable forehead rest for comfort and stability
- Soft seal that conforms to the face, reducing need to overtighten
- Quick-release strap
- Made without DEHP

The mask flexes when the circuit is pulled.

ResMed AcuCare HFNC (high flow nasal cannula)

The ResMed AcuCare™ HFNC is built to allow clinicians to apply it to the patient in seconds. The dual-strap, stretch fabric headgear lets you move the straps apart to loosen, and bring them together to tighten.

The innovative headgear-to-frame combination is designed to stay in place once applied, providing speed and stability for built-in success in high flow oxygen therapy.

Fast, intuitive fit

Cat. no.	Description	Qty.
RSD23003	AcuCare adult high flow nasal cannula small	20/cs
RSD23004	AcuCare adult high flow nasal cannula medium	20/cs
RSD23005	AcuCare adult high flow nasal cannula large	20/cs

Fits in seconds | Stays in place | Enhances comfort

- The dual-strap headgear sits snugly at the crown of the head
- The frame stabilizes the cannula on the face, and suits a wide range of individual facial profiles.
- From this stable platform, the prongs provide a contoured fit in the nares, ensuring patient comfort even at high flow rates.

AirLife smoothbore respiratory circuits

Our NPPV smooth bore respiratory circuits are designed to provide you with a universal, disposable ventilation circuit for all your noninvasive respiratory needs. Contents include:

- 72" smooth bore tube with an inline attached leak test
- Adapter/exhalation port and port cap
- 96" pressure line tube
- Tubing hanger
- Hose clips
- 22 mm connector for nonvented mask applicator

Cat. no.	Description	Qty.
003769	Smooth bore circuit without respiratory filter	10/cs
003770	Smooth bore circuit with respiratory filter	10/cs

AirLife™ heated circuits for adults

Adult single-limb, heated circuit

Adult dual-limb, heated circuit

Humidification is recommended on every patient receiving invasive mechanical ventilation.¹ Vyair offers the products you need to take care of your critical adult patients.

Benefits of AirLife adult heated circuits:

- Can be used for up to 30 days on a single patient
- Made without DEHP, BPA or latex
- Spiral wire design aids in reduction of condensate and helps promote ideal humidity output

AirLife heated circuits for adults have lightweight and flexible tubing. Their wire technology and structured spiral wire design help reduce condensation and deliver ideal humidity output.

Cat. no.	Description	Qty.
Circuit without chamber		
AH102	Single-limb heated circuit for adults, 5'	10/cs
AH180	Dual-limb heated circuit for adults, 5'	10/cs
Circuit with chamber		
AH202	Single-limb heated circuit with chamber for adults, 5'	10/cs
AH280	Dual-limb heated circuit with chamber for adults, 5'	10/cs

AirLife infant heated circuits

Infant single-limb, heated circuit

Infant dual-limb, heated circuit

The heated humidification of infants treated with invasive, mechanical ventilation is recommended by the American Association for Respiratory Care (AARC).¹

The AARC also suggests that heated humidification be used when providing humidification to patients with low tidal volumes or those receiving lung protective therapy.¹ This is most important in your smallest and most sensitive patients.

Benefits of AirLife infant heated circuits:

- Can be used for up to 30 days on a single patient
- Made without DEHP, BPA or latex
- Dual-swivel patient port for ease in positioning of the circuit
- Spiral wire design aids in reduction of condensate and promotes ideal humidity output
- Multiple adapters are included

AirLife high-performance, infant heated circuits have lightweight and flexible tubing. Their wire technology and structured spiral wire design helps reduce condensation and deliver ideal humidity output.

Cat. no.	Description	Qty.
Circuit without chamber		
AH032	Infant single-limb, heated 4' continuous flow circuit (> 4 L/min), pressure line, dry gas line and adapters	10/cs
AH165	Infant dual-limb, dual-heated, 4' high flow circuit (> 4 L/min), pressure line, dry gas line and adapters	10/cs
Circuit with chamber		
AH132	Infant single-limb, heated 4' continuous flow circuit with chamber (> 4 L/min), pressure line, dry gas line and adapters	10/cs
AH265	Infant dual-limb, dual-heated, 4' high flow circuit with chamber (> 4 L/min), pressure line, dry gas line and adapters	10/cs

AirLife™ auto-fill humidification chamber

AH290 Humidification chamber

The AirLife auto-fill humidification chamber is a high-quality addition to our high-performance heated circuits. It aids in delivering ideal humidity to the patient and reduces work flow for clinicians by eliminating the need to manually fill the chamber with sterile water.

AirLife high-performance heated circuits for adults have lightweight and flexible tubing. Their wire technology and structured spiral wire design help reduce condensation and deliver ideal humidity output.

AirLife sterile water in flexible containers

2D0735X (left) and 2D0737 (right)

The closed system design of these flexible sterile water bags helps minimize the possibility of contamination to your patients. When solution bags are attached to the appropriate feed sets and refilling chambers are simplified. The easy one-step set-up offers convenience and reduces patient interruptions.

These bags contain Sterile Water for Inhalation, USP, and are available in two sizes: 1,000 and 2,000 mL.

Cat. no.	Description	Qty.
2D0735X	1,000 mL	14/cs
2D0737	2,000 mL	6/cs

AirLife sterile water in hanging bottle containers

CHB0010 (left) and CHB0020 (right)

The closed system design of these hanging bottles helps minimize the possibility of contamination to your patients. When sterile water hanging bottles are attached to the appropriate feed sets, replenishing empty nebulizers and refilling chambers is simplified. The easy one-step set-up offers convenience and helps reduce patient interruptions. The sterile water hanging bottles contain Sterile Water for Inhalation, USP, and are available in two sizes: 1,000 and 2,000 mL.

Cat. no.	Description	Qty.
CHB0010	Water for inhalation with spikable cap and hanger 1000 mL	12/cs
CHB0020	Water for inhalation with spikable cap and hanger 2000 mL	8/cs

Maxtec SmartStack IV stand

The SmartStack IV stand is a specially designed pole base made from 100% cast aluminum, providing extra stand support and durability. Its patented design will stack neatly with other bases of its kind, allowing for extra storage space, a more organized facility and easy transportation of multiple stands all at once.

AirLife™ HMEs and HMEFs

These Heat and Moisture Exchangers (HMEs) and Filtered Heat and Moisture Exchangers (HMEFs) capture the patient's exhaled heat and moisture and return them in the inspired gas. Small and compact, they are lightweight, provide low resistance to flow and are specially treated to provide bacteriostatic and hygroscopic (HCH) benefits. Select either the large volume or small volume models depending on tidal volume requirements.

Cat. no.	Description	Connection	Qty.
HME-Heat and moisture exchangers			
003003	HME large volume	15 mm male for Y-piece, 15/22 mm female/male for ET tube	50/cs
003010	HME large volume with gas sampling port and 6" flextube	15 mm ISO male for Y-piece; 15 mm female for ET tube; standard luer lock port for gas sampling at dry side	20/cs
003004	HME small volume	15 mm male for Y-piece; 15/22 mm female/male for ET tube	50/cs
003014	HME adult trach with suction port	15 mm female for trach tube	50/cs
003011	HME infant	15 mm ISO male for Y-piece; 15 mm ISO female for ET tube	50/cs
HMEF-Filtered heat and moisture exchangers			
003005	HMEF large volume with gas sampling port	15/22 mm male/female for Y-piece; 15/22 mm ISO female/male for ET tube, closed suctioning system; standard luer lock port for gas sampling at dry and filtered side	25/cs
003006	HMEF small volume with gas sampling port	15 mm ISO male for Y-piece; 15/22 mm ISO female/male for ET tube, face mask, closed suctioning system; standard luer lock port for gas sampling at dry and filtered side	50/cs
003007	HMEF HEPA large volume with gas sampling port	15 mm ISO male for Y-piece; 15/22 mm ISO female/male for ET tube, closed suctioning system; standard luer lock port for gas sampling at dry and filtered side	20/cs
003009	HMEF large volume with gas sampling port and 6" flextube	15/22 mm ISO male/female for Y-piece; 15 mm female for ET tube, closed suctioning system; standard luer lock port for gas sampling at dry and filtered side	15/cs

Edith HMEs

AirLife Edith heat and moisture exchangers meet the HME requirements for adult and pediatric patients in the OR, intensive care unit and other respiratory care environments. The Edith Trach was specially designed to support tracheostomized patients, allowing spontaneously breathing patients to benefit from heat and moisture conservation.

Bypass HME

AirLife Bypass HME (BHME) technology delivers aerosolized medication treatments without breaking the ventilator circuit. Easy one-handed operation allows bypass engagement for simple medication delivery set-up. The bypass lever position and clear visual indicators help identify gate engagement. The filtered BHME helps minimize the risk of respiratory complications and reduces the risk of cross-contamination.

Cat. no.	Description	Qty.
003020	AirLife non-filtered bypass HME	25/cs
003021	AirLife filtered bypass HME	25/cs

AirLife BHME

Optional filter helps minimize the risk of respiratory complications and reduces chance of cross-contamination.

Bypass lever position and clear visual indicators ensure gate engagement.

AirLife™ nonconductive bacterial/viral-retentive filter

Filter 001851

AirLife disposable respiratory filter is designed to trap bacteria and viral particles by electrostatic attraction and its dense makeup. Small, lightweight and translucent, our hydrophobic filter resists moisture and offers easy visualization of water buildup.

Specifications

Bacterial filtration efficiency (BFE)	99.9995%
Viral filtration efficiency (VFE)	99.995%
Flow resistance at 1.4cmH ₂ O	60Lpm

Cat. no.	Description	Qty.
001851	Nonconductive bacterial/viral-retentive	50/cs

Change frequency: 24 hours

AirLife high-efficiency respiratory filter with diffuser

High-efficiency filter 001853

Our AirLife high-efficiency filter is made of hydrophobic polypropylene and has 22/15 mm male/female and 22 mm female ISO connectors.

Specifications

Bacterial filtration efficiency (BFE)	99.999%
Viral filtration efficiency	99.999%
Flow resistance at 2.5cm H ₂ O	60Lpm

Cat. no.	Description	Qty.
001853	AirLife high-efficiency respiratory filter with diffuser	50/cs

Change frequency: 48 hours

AirLife filters for small bore tubing

Small bore tubing filters 305EU and 311EU

Cat. no.	Description	Qty.
305EU	Oxygard filter for pressures less than 25psi	50/cs
311EU	Hydrogard filter	50/cs

Uni-Filters

Disposable bacterial/viral filters provide highly efficient protection against various types of microorganisms present in breathing circuits. These filters reduce the transfer of bacteria and viruses among patients, personnel and equipment. Uni-Filters use electrostatic means to capture harmful submicron particles, while its hydrophobic membranes repel humidity from the filter medium. The transparent housing allows visualization of humidity or secretions within filter.

Cat No	Description	Qty
557021200	Uni-Filter	45/cs

OY3770

Cat. no.	Description	Qty.
001793	Two 6' flexible corrugated tubes, ported patient "Y" with port plugs, elbow connector and tube hanger	6/cs
OP1775	Two 72" flexible corrugated tubes, ported patient parallel "Y" with port plugs, elbow connector, inspiratory connector, angled temp port with plug at distal limb and tube hanger	10/cs
OP1776	Two 72" flexible corrugated tubes, ported patient parallel "Y" with port plugs, elbow connector, inspiratory connector, angled temp port with plug at distal limb, tube hanger and 1/4" and 1/8" pressure sensing lines	10/cs
OY1777	Two 72" flexible corrugated tubes, ported patient "Y" with port plugs, elbow connector, inspiratory connector, angled temp port with plug at distal limb, tube hanger, 1/4" and 1/8" pressure sensing lines and valved tee	10/cs
OY3770	72" adult segmented tubing, polypropylene "Y" with temperature and pressure sensing ports with caps, tube holder, hose clips, external exhalation valve, exhalation drive line and expiratory spirometer adapter, 1/4" pressure line and angled, capped temperature port connector on inspiratory limb	10/cs

003764

AirLife adult single-limb portable ventilator circuits

Cat. no.	Description	Qty.
003764	7' single limb, 6" patient tube, 1/8" and 1/4" pressure lines, silicone diaphragm exhalation valve	15/cs

AirLife pediatric non-heated circuits

Cat. no.	Description	Qty.
6833-701	6' dual limb with dry gas 2 pressure lines, standard wye, exhalation valve, water trap and Omni-Flex adapter	20/cs

AirLife infant non-heated circuits

Cat. no.	Description	Qty.
6800-503	4' dual limb dry gas and 2 pressure lines, standard wye, water trap and Omni-Flex adapter	30/cs

AirLife IPPB circuits

AirLife IPPB universal manifolds are compatible with Bird®, Puritan Bennett® and other commonly used IPPB devices. They feature a silicone diaphragm inside a retainer cap that can be turned to direct exhaled air away from the therapist and patient. All include 39" (22 mm ID) tubing, two supply lines, 6" (22 mm ID) flextube and mouthpiece.

Cat. no.	Description	Qty.
001608	With 360° baffled nebulizer for small particle size	50/cs
001628	With 120° baffled Quick-Neb™ right angle nebulizer	50/cs

AirLife™ Ventilator Monitoring Adapter Circuit

AirLife Ventilator Monitoring Adapter Circuit 001504

Our circuit is a flexible, single-patient-use, one-way valving system designed for pulmonary function measurements, such as tidal or minute volume, vital capacity and negative inspiratory force. Circuit comes with a U/Adapt-It™ adapter with 15 mm ID base, 6" flextube, two one-way valves, an oxygen tube connector, a 22 mm OD tube adapter and a 22 mm ID/15 mm ID adapter.

Cat. no.	Description	Qty.
001504	Ventilator monitoring adapter circuit	50/cs

Disposable thermometers

The TempO₂ I™ and TempO₂ II™ systems offer a multitude of thermometer configurations, both liquid column and liquid crystal, designed for all applications and to meet most temperature monitoring situations.

Liquid column thermometers may be used with most ventilator manifolds and heated aerosol set-ups. The small tapered end will fit most ported straight adapters and patient wye adapters, or its 15 mm OD circumference may be inserted into any standard tee adapter. Readout is provided in both Fahrenheit and Celsius.

Liquid crystal thermometers produce a direct digital readout that can be placed in the inspirator limb of the patient circuit. They have a Celsius scale of 20° to 42° with a convenient Fahrenheit conversion table alongside. Temperature is determined by using the three-color readout bands. Green means temperature is exact, tan means it is slightly higher, and blue means it is slightly lower.

Cat. no.	Description	Qty.
TempO₂ I Liquid column thermometers		
001951	With 004086 U/Adapt-It connector, both arms 22 mm (7/8") OD	50/cs
001952	With 004084 U/Adapt-It connector, one arm 22 mm (7/8") OD and one arm 22 mm (7/8") ID	50/cs

AirLife connectors for Omni-Flex™ systems

AirLife pediatric connector 3215

AirLife adult connector 3222

Our AirLife connectors for Omni-Flex systems provide an additional length of tubing for your ventilator circuit for increased flexibility and mobility. Connect between a patient's endotracheal or tracheostomy tube and ventilator circuit wye connection or HME. Connectors expand from 5 to 6.5 cm.

Cat. no.	Description	Qty.
3215	Pediatric, 15 mm OD x 15 mm ID	50/cs
3222	Adult, 15 mm OD x 22 mm OD	50/cs

Disposable water traps

Water trap 001860

Water traps left 5275P, right 5276

Our water traps are for use with 22 mm tubing.

Cat. no.	Description	Qty.
5275P	Twist valve	50/cs
001860	Self-sealing	50/cs

Infant nebulizer tees

Infant neb tee with cap 5903-504

Our infant nebulizer tees can be used to convert an adult nebulizer for infant use. They are clean and ready to use.

Cat. no.	Description	Qty.
5903-504	Infant nebulizer tee with cap	30/cs

Valved tee adapters

Valved tee adapter 002058 shown in use

Valved tee adapters 002058, 002060, 002061

Our valved tee adapters make it easy to deliver aerosolized medication to your ventilator patients. Used in conjunction with a nebulizer, the valved tee adapter offers a safe and convenient way to introduce medication into the circuit.

Unlike other tee adapters that require time-consuming and potentially hazardous breaks in the system, the valved tee adapter becomes a permanent part of the ventilator circuit. Its spring-loaded valve opens and closes the circuit during nebulizer insertion and removal.

Because the adapter maintains a closed system, the risk of condensate being accidentally sprayed into the air is greatly reduced. Choose from three sizes for placement at different locations in the circuit. The adapter is sold with the spring loaded valve and cap, and includes the 18 mm base.

Cat. no.	Connection	Qty.
002058	15 mm ID x 15 mm OD	30/cs
002060	22 mm OD x 22 mm OD	30/cs
002061	22 mm ID x 22 mm OD	30/cs

Infant skin temperature probes

Disposable infant temperature probe 2074816-001 / 2074817-001 for use with GE Panda and Giraffe systems

Reusable infant temperature probe 2075796-001 for use with GE Panda and Giraffe systems

Reusable infant temperature probe 6600-0628-700 for use with GE Lullaby systems

Disposable infant temperature probe 6600-0196-700 / 6600-0208-700 for use with GE Lullaby systems

Temperature is a key vital sign when monitoring premature infants, as they are vulnerable to having abnormally low core temperatures. Our infant skin temperature probes provide a less invasive method of temperature management to help monitor the body temperature of premature newborns who experience difficulty maintaining normothermia.

Cat. no.	Description	Qty.

T-piece resuscitation kit

Universal device connector fits both 15 mm male and 10 mm female connections without the need for an additional adapter.

Neonatal T-piece circuit with size 1 mask M1091365VS for use with GE StAR system

The T-piece resuscitator kit is a single-patient-use resuscitator circuit intended to provide respiratory support for neonatal patients. It is designed with a positive end-expiratory pressure (PEEP) valve to help maintain optimal pressure and made of corrugated tubing without any latex or added DEHP.

Cat. no.	Description	Qty.

Phototherapy pad covers and nests

Disposable pad cover slips over the LED pad with transparent straps to wrap around the baby while swaddling.

Phototherapy pad cover - M1097109

Disposable nest offers boundaries and support with a cushy foot roll and gentle, transparent straps.

Phototherapy nest - M1093123

Our phototherapy disposables help provide simple intensive therapy when newborns present with hyperbilirubinemia. These ultra-soft disposable pad covers and nests are made of flame-retardant fabric gentle on sensitive newborn skin. Designed to help promote skin to skin contact, the pad covers and nests enable comfortable swaddling and much needed support during phototherapy treatments.

Cat. no.	Description	Qty.
Phototherapy pad covers for use with GE Bilisoft phototherapy system		
M1093120	Small pad cover for babies <1500grams	50/cs

Maxtec EyeMax™ phototherapy masks

EyeMax phototherapy masks

The EyeMax™2 is designed to adapt to the baby's changing head shape. The single-piece, wrap-around design attaches at two points on either side of the baby's head and can be independently adjusted to prevent unwanted movement and allow a perfect fit. The special UV light eye protection pad has been ergonomically designed to prevent "light leaks".

Cat. no.	Description	Qty.

R300P02	Phototherapy mask - premie 10.4" to 12.6" (orange)	20/cs

Meconium suction device—(Kurtis MSD)

All-in-one neonatal suction catheter and endotracheal tube

The AirLife Meconium Suction Device (MSD) reduces the number of steps to suction meconium from an infant’s trachea by integrating the endotracheal tube, suction adapter, and stylet. Designed by a neonatologist, the AirLife MSD is typically less expensive than buying components separately and requires less assembly during “high anxiety” births. Device is available in 2 sizes.

Cat. no.	Description	Qty.
4535EU	Meconium suction device 3.5 mm	10/cs
4530VS	Meconium suction device 3.0 mm	10/cs

Misty Max 10® disposable nebulizer

Our Misty Max 10® disposable nebulizer delivers fast and effective treatment to a wide range of patients. They feature a one-piece jet design that delivers high output rates, resulting in faster treatment times and consistent medication delivery.

A full 10 cc capacity provides medication dosing flexibility. The anti-spill design helps prevent medication waste and allows the unit to be used at an angle to accommodate various patient positions.

Nebulizer with bacteria filter 002450 provides protection and convenience through its utilization of a reservoir and one-way valves for administration of medicated aerosol. The aerosol is contained within the nebulizer system instead of freely flowing into the surrounding air.

The chart below provides the in vitro performance characteristics of the AirLife Misty Max 10 nebulizer. In vitro measurements will help guide the end user as to the likelihood of effective delivery of inhaled medication to the lower respiratory tract.

Performance characteristics	5 L/min flow	8 L/min flow	10 L/min flow
MMAD Mass median aerodynamic diameter (µM)	2.21 ± 0.07	1.61 ± 0.09	1.30 ± 0.07
GSD Geometric standard deviation	2.05 ± 0.14	2.18 ± 0.262	2.20 ± 0.06
Respirable fraction % < 4.7µM (by mass)	79.7 ± 1.7	85.2 ± 3.2	91.5 ± 0.9
Output rate (gpm)	0.252 ± 0.009	0.325 ± 0.010	0.329 ± 0.010
Treatment time 3 mL albuterol solution (min.)	9.97 ± 0.03	8.16 ± 0.30	7.36 ± 0.26
Residual (g)	0.91 ± 0.03	0.92 ± 0.06	0.89 ± 0.04
Operating pressure (psi)	10.7 ± 0.5	24.9 ± 0.3	34.2 ± 0.8
Inhaled respirable mass 3 mL dose of 0.083% albuterol (µg)	365 ± 10	384 ± 4	362 ± 14

Misty Fast™ small volume nebulizer

The Misty Fast small volume nebulizer is the perfect choice for hospitalized patients. It delivers comparable results to the AirLife Misty Max 10, but in half the time. The one piece jet design delivers high output rates and consistent medication delivery. Misty Fast's swivel mouthpiece provides for greater patient positioning to enhance comfort during treatment. Multiple kit configurations provide you with the solution options to meet your medication delivery needs. Misty Fast is designed to be used in hospital setting only.

AirLife™ filtered nebulizer system*

AirLife filtered nebulizer system 124030EU

The AirLife filtered nebulizer system is suitable to deliver aerosolized respiratory medications. Its design and configuration help minimize the environmental impact of any aerosolized medication compared to a standard small volume nebulizer.

Cat. no.	Description	Qty.
124030EU	AirLife filtered nebulizer system with baffled tee, flex tube, oxygen tubing, mouthpiece, one-way valves and an expiratory filter	20/cs

*Formerly known as the Respigard II nebulizer system.

KidsMed infant and pediatric aerosol masks

Masks clockwise from left: T.C. Turtle® mask 001271, Nic the Dragon® mask 001266, Eden the Elephant® mask 001276

Designed to reduce fear of treatment with an aerosol mask and encourage use compliance during asthma therapy, these character-themed masks provide effective medication delivery while enabling asthma treatment for children. The toy-like masks aid in the perception that the character is breathing along with the child, which encourages the patient to take frequent deep breaths, allowing for a more effective and fun treatment. The masks' soft, polyvinyl chloride construction ensures a comfortable fit. Infant and pediatric sizes are available with three different characters.

Cat. no.	Description	Qty.

Philips Respironics SideStream Plus breath-enhanced high-efficiency nebulizers

SideStream Plus breath-enhanced high-efficiency nebulizer features an easy-action inspiratory valve that opens on inspiration to boost medication delivery and closes on exhalation, preserving medication and reducing waste. Significantly less pressure is required to open the inspiratory valve compared to most breath-enhanced nebulizers. There's no need to remove the valve when using a mask, making treatments easier for pediatric and elderly patients. With its proven SideStream five-jet venturi design, SideStream Plus provides a high respirable fraction and shortens treatment times.

The Sami the Seal child-friendly mask is designed to appeal to children and has been shown to reduce aerosol deposition in and around the eyes. Used with SideStream nebulizers, Sami is made of soft, flexible material for comfort and fit. The SideStream Plus adult mask is recommended for use with the SideStream Plus breath-enhanced nebulizer. The reusable mask is contoured to fit the face.

*Averaged performance of leading conventional nebulizers

Misty Finity™ continuous nebulizers

Misty Finity continuous nebulizer series

The benefits of continuous nebulization therapy are enhanced with the reliability, flexibility and consistent performance of our Misty Finity nebulizers. Across multiple patient settings, they enhance the delivery of aerosol therapy for patients within current medication dosing requirements. They feature easy assembly, spill-resistant caps and built-in IV ports. Multiple sizes and configurations are available.

The large-volume, high-flow nebulizers offer both direct-connect (directly to flow meter) and straight-connect options (connect via oxygen tubing to flow meter). Their 240 mL capacity allows for up to eight hours of therapy.

With both low-flow and high-flow options, the medium-volume nebulizers provide options for both mask and in-line therapy. The low-flow nebulizer allows for up to four hours of therapy; the high-flow nebulizers allow for up to two hours of therapy. All have a capacity of 30 mL.

The small-volume, low-flow nebulizer allows for up to one hour of therapy at 4 L/min flow rate and two hours of therapy at 2 L/min flow rate. Its capacity is 10 mL.

Performance data*	MMAD	GSD	Respirable Fraction (% < 4.7µM)

Philips Respironics OptiChamber Diamond valved holding chamber

OptiChamber Diamond VHC

The OptiChamber Diamond valved holding chamber (VHC) is smaller than most conventional VHCs and incorporates a stepped mouthpiece, a clear, anti-static chamber, and a low resistance expiratory valve that helps measure breath count and breath hold. For use with inhaled steroids, as well as long-acting and rescue pressurized metered dose inhaler (pMDI) medications, OptiChamber Diamond's intuitive design enhances medication delivery and compliance for patients of all ages, at home or in the hospital.

Philips Respironics LiteTouch face masks

LiteTouch face masks

LiteTouch mask's soft-seal technology is designed to contour to the face, reducing leakage with minimal applied force. It is designed to be more comfortable and less technique dependent than conventional masks. It's clear, rigid structure provides easy application and an unrestricted view of the patient's face during therapy. The masks are detachable and are available in three sizes.

Philips Respironics ProChamber valved holding chamber

ProChamber valved holding chamber HS2003-050

This professional model valved holding chamber is ideal for acute respiratory care settings. For use with pediatric masks for infants and children, it is small in size and provides effective drug delivery. With a 145 mL volume, the chamber measures 53/4" long and has a 2" diameter. Mouthpiece has a 22 mm standard OD. Masks come in three sizes and are available separately.

KidsMED Reggie the Rabbit® pediatric spacer mask

Reggie the Rabbit spacer mask 002088

This colorful, toy-like rabbit spacer mask is designed to help children feel more comfortable during their MDI therapy. Proper MDI procedure without a mask is often difficult to administer to young children; the Reggie the Rabbit mask can help reduce a child's fear and increase compliance with MDI therapy, allowing for a more effective and fun treatment.

The spacer mask is constructed of soft, polyvinyl chloride with rabbit facial details in nontoxic paint. Mask measures 4"W x 23/4"H x 11/2"D. Its adapter port has a 3/4" diameter and fits most spacers.

001503	Tee adapter for small nebulizers, with 22 mm OD arms and 18 mm ID base	50/cs

AirLife valved tee adapters

Valved tee adapter 002058 shown in use

Valved tee adapters 002058, 002060, 002061

Our valved tee adapters make it easy to deliver aerosolized medication to your ventilator patients. Used in conjunction with a nebulizer, the valved tee adapter offers a safe and convenient way to introduce medication into the circuit.

Unlike other tee adapters that require time-consuming and potentially hazardous breaks in the system, the valved tee adapter becomes a permanent part of the ventilator circuit. Its spring-loaded valve opens and closes the circuit during nebulizer insertion and removal.

Because the adapter maintains a closed system, the risk of condensate being accidentally sprayed into the air is greatly reduced. Choose from three sizes for placement at different locations in the circuit. The adapter is sold with the spring loaded valve and cap, and includes the 18 mm base.

AirLife™ AsthmaCheck™ peak flow meter

AsthmaCheck™ peak flow meter 002068

The AsthmaCheck peak flow meter measures a patient’s peak expiratory flow and helps monitor respiratory conditions, including asthma. Its built-in, three-zone system facilitates patient training and compliance, and allows for flexibility in setting the zones to meet patients’ individual needs.

Measuring only 2.25" x 6", the meter meets ATS standards for accuracy and precision. The AsthmaCheck meter is equipped with an easy-grip handle to direct hands away from the airflow path and features a linear scale that measures from 60 to 810 L/min in increments of 10 L/min. Designed for single-patient use, the device can be cleaned with soap and water and is top-rack dishwasher safe. Disposable one-way valve mouthpieces are also available to offer protection from cross-contamination during multipatient screenings. This device meets ATS standards for accuracy and precision.

Philips Respironics AsthmaPACKS: adult and pediatric

109-9014 AsthmaPACK adult

The Personal Asthma Care Kit (PACK) for patient adherence implements three key elements of the NAEPP asthma treatment guidelines with one prescription: peak flow monitoring, MDI drug delivery and asthma education. Provide your patients with the tools needed to better understand their asthma with a comprehensive, clinician-directed, patient-managed asthma plan. AsthmaPACK includes a PersonalBest peak flow meter, OptiChamber Diamond valved holding chamber, self-help booklet, instructional video, educational self-help booklet and a carrying case.

AsthmaPACK children’s asthma care kit is designed to make learning fun with engaging cartoon characters and age-appropriate devices. An exciting feature of this kit is the interactive bilingual (English/Spanish) coloring and activity storybook, “Tucker Tackles Asthma.” The kit contains a low range PersonalBest peak flow meter, OptiChamber Diamond valved holding chamber, coloring book, crayons, self-help booklet, instructional DVD and carrying case.

AirLife™ soft lariat cushion cannulas

AirLife® soft lariat cushion cannula SFT2699

AirLife soft cushion cannulas include lariat tubing that is approximately 37%* softer than our standard AirLife cannulas. This soft tubing helps reduce chafing behind the ear to minimize skin irritation. These latex-free cannulas come with crush-resistant tubing to minimize occlusion and kinking.

*Based on a material durometer difference of 30 using the Shore A hardness scale.

Cat. no.	Description	Qty.
SFT2692	Pediatric soft with 7' U/Connect-It® tubing	50/cs
SFT2699	Adult soft with 7' U/Connect-It tubing	50/cs

AirLife foam cover cushion cannulas

AirLife foam cover cushion cannulas FM2699

AirLife cushion cannulas with soft foam ear covers help reduce skin irritation around the ears. The soft, gray covers slide smoothly on the headset tubing, making them easy to position for enhanced comfort and fit. These latex-free cannulas come with crush-resistant tubing to minimize occlusion and kinking. The foam ear covers are also sold separately and can be easily added to any oxygen delivery device for patient comfort and reduced skin irritation.

Cat. no.	Description	Qty.

AirLife™ standard nasal cannulas

Nasal cannula flared (top), Nasal cannula nonflared (bottom)

The AirLife standard nasal cannulas offer an angulated, flexible lip plate, which provides comfort at the tip of the nasal region, with beveled tips to provide a softer edge. Disposable cannulas are curved and are available with flared or nonflared tips. They are packaged separately with varying lengths of oxygen tubing. All oxygen supply tubing is crush-resistant to minimize occlusion and kinking.

Cat. no.	Description	Qty.

Vital Signs™ Capnoflex end tidal CO₂ sampling cannulas

End tidal CO₂ sampling cannula for Capnoflex

The Vital Signs ETCO₂ sampling cannulas for Capnoflex have a proprietary design for use exclusively with the Capnoflex module utilized with the GE Dash 3000/4000/5000™ patient monitors. They are offered in a variety of styles for all patients, in both nasal and oral/nasal designs with or without oxygen delivery. Many of the Capnoflex kits have Nafion sampling lines offering extended usage for patients that are receiving high humidity. All cannulas come with 8' sampling lines.

Oxygen masks

3-in-1 adult mask, elongated

Adult under-the-chin-style mask 001201

AirLife disposable oxygen masks are latex-free and made from soft, high-grade vinyl resins. The smooth, feathered edges are designed for patient comfort while reducing irritation points. AirLife oxygen masks are designed for anatomical compatibility. A full range is available to meet all requirements in infant, pediatric and adult sizes. AirLife 3-in-1 masks are packaged as high-concentration, non-rebreathing masks complete with reservoir bags and one-way valves.

AirLife™ venturi-style masks

Venturi-style mask 001240

We offer a wide selection of standard venturi-style masks that feature six diluter jets ranging from 24% to 50% FiO₂. The masks are available with various oxygen diluters to accommodate pediatric or adult patients. All masks are under-the-chin style and are supplied with 6" flextube, humidification hood and 7' crush-resistant tubing. We also offer a venturi-style adapter kit with a tracheostomy mask. For use with 50 psi oxygen source and flowmeter.

Cat. no.	Description	Qty.
Diluter jet venturi-style masks		
001240	Adult, with 6" flextube, 6 diluter jets (24%, 28%, 31%, 35%, 40% and 50% oxygen concentrations), humidification hood and 7' tubing	50/cs
001363	Adult, with U/Connect-It tubing	50/cs
001248	Adult, tracheostomy, with 6" flextube, 6 diluter jets (24%, 28%, 31%, 35%, 40% and 50% oxygen concentrations), humidification hood and 7' tubing	50/cs
001250	Pediatric, with 6" flextube, 6 diluter jets (24%, 28%, 31%, 35%, 40% and 50% oxygen concentrations), humidification hood and 7' tubing	50/cs
Trach tee		
001247	With 6" flextube, 6 diluter jets (24%, 28%, 31%, 35%, 40% and 50% oxygen concentrations), humidification hood, 7' tubing	50/cs

AirLife Dual Dial™ venturi-style masks

Dual Dial venturi-style mask 001255

Utilizing two oxygen concentration dials, our venturi-style masks deliver nine specific oxygen concentrations ranging from 24% to 55% O₂. They accommodate pediatric and adult patients. Each mask comes complete with 7' of crush-resistant oxygen tubing, 6" flextube, color-coded low and medium concentration dials, a high-humidity adapter and a humidification hood. For use with 50 psi oxygen source and flowmeter.

AirLife™ prefilled humidifier systems

Compact prefilled humidifier with adapter 002620

Filled with Sterile Water for Inhalation, USP, these humidifier systems feature a dual-purpose reservoir with a snap-open trigger, which makes a round opening for secure attachment of a humidifier adapter (available with Humidifier Systems 002620 and AL2702, and also separately). The oxygen pathway is designed to help prevent particulate from reaching oxygen delivery tubing. An audible relief valve warns if the patient's tubing becomes occluded.

Designed for convenient shelf storage, **Compact Humidifier 002620** has a multiangle outlet port that prevents spitting, even at high flow rates, and a small bottle opening that prevents refilling. It includes an adapter and a 4 psi pressure-relief valve with alarm.

Cat. no.	Description	Qty.
002620	With humidifier adapter, 500 mL	12/cs

AirLife prefilled nebulizer kits

Our prefilled nebulizers provide performance and ease of use. You can obtain heated and cool high-output aerosols adjustable from 28% to 100% FiO₂. We offer a wide selection of solutions: Sterile Water for Inhalation, USP; 0.45% Sodium Chloride for Inhalation, USP; and 0.9% sodium chloride for inhalation, USP.

Cat. no.	Description	Qty.
Prefilled nebulizer kits packaged with adapter		
CK0005	500 mL Sterile Water for Inhalation, USP	12/cs
CK0010	1000 mL Sterile Water for Inhalation, USP	12/cs
CK4505	500 mL 0.45% Sodium Chloride for Inhalation, USP	12/cs
CK4510	1000 mL 0.45% Sodium Chloride for Inhalation, USP	12/cs
Nebulizer replacement water		
CN0005	500 mL Sterile Water for Inhalation, USP	18/cs
CN4505	500 mL 0.45% Sodium Chloride for Inhalation, USP	18/cs
CN4510	1000 mL 0.45% Sodium Chloride for Inhalation, USP	12/cs
CC05	Nebulizer adapter for 500 mL container	24/cs
CC10	Nebulizer adapter for 1000 mL container	24/cs

AirLife empty humidifiers

Empty humidifiers left 002003, right 002006

Transparent for maximum clarity, our latex-free AirLife empty humidifiers provide an economical alternative to prefilled humidifiers. These 370 mL capacity units have an audible-alarm pressure-relief valve to warn patient and caregivers of obstructions to flow. Available with either a 3 or 6 psi pressure-relief valve. The 6 psi model is designed for applications where longer lengths of tubing can increase back pressure. With both the jar and lid constructed of break-resistant plastic, humidifiers also feature an ergonomically designed, durable plastic flowmeter nut.

Cat. no.	Description	Qty.
002003	370 mL capacity, with 3 psi valve (white cap)	50/cs
002006	370 mL capacity, with 6 psi valve (blue cap)	50/cs

Prefilled nebulizer kits left CK0010, right CK0005

AirLife™ empty nebulizers

350 mL nebulizer 002002

500 mL nebulizer 5207

Empty nebulizer 002002 has FiO₂ settings adjustable from 35% to 100%.

Empty nebulizers 5207 has FiO₂ settings adjustable from 28% to 98%.

Cat. no.	Description	Qty.
002002	350 mL	24/cs
5207	500 mL	50/cs

Misty Ox™ high flow nebulizers

Misty Ox high flow 441H

Misty Ox GIN (Gas Injection Nebulizer) 441G

Misty Ox high flow nebulizers are designed for accurate continuous aerosol therapy at flow rates up to 110 liters per minute (LPM) to meet even the most challenging patient's inspiratory demands. Available in an air entrainment design (441H) as well as a closed system design (441G) for quieter operation. These nebulizer adapters are compatible with most standard pour bottle solutions.

Cat. no.	Description	Qty.
441H	Misty Ox High flow for FiO ₂ 's from 60-100 at flow ranges from 42-89 LPM	24/cs
441G	Misty Ox GIN for FiO ₂ 's from 60-100 at flow ranges from 40-110 LPM - requires both air and oxygen 50 psi gas sources	24/cs

Flow-inflating resuscitation kits	69
Resuscitation accessories	70

AirLife™ Self-inflating resuscitation devices II

Adult resuscitation bag 2K7010

Pediatric resuscitation bag 2K7102

The AirLife single patient use resuscitation devices II are designed with a light-weight, textured bag for secure handling and user comfort. The clear valve housing provides an unobstructed view of the valve operation while the 360° swivel connector helps optimize positioning of the device. The adult and pediatric bags collapse for ease of storage, and all bags are latex-free. The oxygen tubing includes a U/Connect-It® adapter for easy connection to any oxygen source. Accessories include a manometer, PEEP valve, CO₂ detector, expiratory filter, and masks. Available in infant, pediatric and adult sizes in numerous configurations to meet your resuscitation needs.

Cat. no.	Description	Qty.
Adult		
2K7000	Adult, bag reservoir, medium mask, 7' oxygen tubing	6/cs
2K7001	Adult, bag reservoir, medium mask, pressure-relief valve, 7' oxygen tubing	6/cs

Self-inflating resuscitation devices

Pediatric resuscitation bag 2K8020

Resuscitation bag family

Reliable and affordable, our single patient use self-inflating resuscitation devices helps answer your contamination concerns in today's healthcare environment. Our devices feature a textured bag, double-swivel elbow, and three removable oxygen reservoir options. **All kits come with 10' U/Connect-It oxygen tubing for easy connection to any oxygen source.** Accessories include PEEP valve, manometer or 7' manometer tubing, expiratory filter, CO₂ detector and pressure-relief valve.

Cat. no.	Description	Qty.

Baby Safe™ flow-inflating resuscitation devices

5501GL1

5424BDG1

Baby Safe is an innovative, flow-inflating resuscitator for your most delicate of patients. It features a unique adjustable pressure-limiting (APL) valve which helps maintain peak inspiratory pressure and reduces the risk of barotrauma and an optional bleed vent to help control positive and expiratory pressure (PEEP) - making resuscitation easier for the clinician and safer for the patient. Baby Safe comes preassembled with the optional pressure manometer attached, making it ready for immediate use when every second matters.

Cat. no.	Description	Qty.
0.5 L bag kits without mask		
5404BD	0.5 L bag, 35 cm H ₂ O valve, NRPR vent, 6' pressure tubing, 7' O ₂ tubing	20/cs

AirLife™ disposable flow-inflating resuscitation devices

Flow-inflating bag 2K80233

AirLife disposable flow-inflating resuscitation devices feature green, neoprene bags with 7' of pre-attached oxygen tubing with a U/Connect-It fitting to easily connect to an oxygen source. Five sizes are available, from neonate to adult, with a range of accessories including valved masks, manometers and manometer tubing.

Cat. no.	Description	Qty.
2K80233	Flow-inflating bag 0.25 L with valved neonate mask and manometer	20/cs
2K8025	Flow-inflating bag 0.5 L	20/cs
2K80252	Flow-inflating bag 0.5 L with manometer	20/cs
2K80253	Flow-inflating bag 0.5 L with valved infant mask and manometer	20/cs
2K8027	Flow-inflating bag 1 L	20/cs
2K80272	Flow-inflating bag 1 L with manometer	20/cs
2K80273	Flow-inflating bag 1 L with valved child mask & manometer	20/cs
2K8029	Flow-inflating bag 2 L	20/cs

2K8030	Flow-inflating bag 3 L	20/cs

AirLife™ mouth-to-mask resuscitators

Mouth-to-mask resuscitator 2K8012

Our AirLife mouth-to-mask resuscitators include oxygen port, filter and mouthpiece. Choose pediatric or adult.

Cat. no.	Description	Qty.
2K8013	Pediatric with 6" tubing	10/cs
2K8012	Adult with 6" tubing	10/cs

AirLife disposable resuscitation face masks

Disposable face masks are designed for use with manual and automatic resuscitators and ventilators. They feature a dome with a thumb rest and a soft, shaped, air-filled cuff to allow a tight fit to the patient's face with an easy grip. Supplied with hook ring. Mask dome and cushion are made of PVC. All sizes are individually packed, nonsterile.

Cat. no.	Size	Qty.
2K8050	Neonate	20/cs
2K8051	Infant	20/cs
2K8052	Toddler	20/cs
2K8053	Child/small adult	20/cs
2K8054	Medium adult	20/cs
2K8055	Large adult	20/cs

AirLife adjustable PEEP valves

PEEP valve 2K8080

Our disposable AirLife PEEP valves are for use with resuscitation devices. They have a range of 5 to 20 cm/H₂O and come with a blue cap.

Cat. no.	Description	Qty.
2K8082	Valve with 30 mm ID connection and 22 mm adapter	10/cs
2K8080	Valve with 30 mm ID connection	10/cs

AirLife CO₂ detectors

AirLife CO₂ detectors 2K8086 (left), 2K8085 (right)

The AirLife CO₂ colorimetric detectors with Seebreath technology help verify tracheal tube placement and observe respiration through breath-by-breath color changes. These long-lasting CO₂ detectors detect expired CO₂ levels for up to 24 hours and feature a lightweight design with easy-to-see color change.

Cat. no.	Description	Qty.
2K8085	Adult and pediatric: 10 kg (22 lbs) and larger	10/cs
2K8086	Infant: 1 kg (2.2 lb)–15 kg (33 lb)	10/cs

T-piece resuscitation kit

Universal device connector fits both 15 mm male and 10 mm female connections without the need for an additional adapter.

Neonatal T-piece circuit with size 1 mask M1091365VS

The T-piece resuscitator kit is a single-patient-use resuscitator circuit intended to provide respiratory support for neonatal patients. It is designed with a positive end-expiratory pressure (PEEP) valve to help maintain optimal pressure and made of corrugated tubing without any latex or added DEHP.

Cat. no.	Description	Qty.
AirLife T-piece circuits for use with GE Stand alone resuscitation system (StAR)		
M1091335VS	T-piece neonatal circuit	10/cs
M1091316VS	T-piece neonatal circuit kit, size 0 mask	10/cs
M1091365VS	T-piece neonatal circuit kit, size 1 mask	10/cs

Verso™ closed suction system

CSC100 airway access adapter with CSC114 14 Fr catheter

CSC500 Verso "T" airway access adapter

The AirLife® closed suction system provides safe and simple access to a ventilated patient's airway. Utilizing the Verso™ airway access adapter, the system allows procedure and catheter change-outs to be done through a single port without ever disconnecting the circuit. Safe, continuous ventilation throughout these changes are assured through Pucker™ Valve technology, which seals the patient's airway from the access port. It is available in neonatal/infant and adult/ pediatric sizes. The Verso and Neo-Verso™ adapters are approved for use up to seven days, and the catheters are approved for use up to 72 hours.

CSC100 Verso 45° airway access adapter

CSC400 Verso 90° airway access adapter

Cat. no.	Description	Qty.
Verso adapters		
CSC100	Verso 45° adult/pediatric airway access adapter double swivel	20/bx
CSC400	Verso 90° adult/pediatric airway access adapter	20/bx

CSC208	8 Fr w/depth markings	50/cs
Specialty catheter sterile (for use with Neo-Verso adapter)		
CSC205S	5 Fr, fluid/access	50/cs

AirLife Tri-Flo® catheters

Looped catheter with control port and depth markings T64C

Tri-Flo sterile suction catheters are designed with two triangular eyes and a beveled tip to be less traumatic to your patients while still providing high suctioning efficiency. Clear connectors and depth markings are standard on all 5/6, 8 and 10 Fr sizes. Catheters are available with or without a control port to provide you with the choice of continuous or controlled suctioning.

Cat. no.	Description	Qty.
With control port, looped		
T63C	5/6 w/depth markings	50/cs
T64C	8 w/depth markings	50/cs
T61C	10 w/depth markings	50/cs
T68C	12	50/cs
T60C	14	50/cs
T62C	18	50/cs

Top catheter end with control port; bottom catheter end without control port

Beveled catheter tip with two triangular eyes

Tri-Flo sterile catheters are designed with a plastic sleeve to provide an additional layer of safety between the clinician and the patient. Catheters include a pop-up basin for your solution.

Cat. no.	Description	Qty.
With control port, looped		
T64C	8 w/depth markings	50/cs
T61C	10 w/depth markings	50/cs
T68C	12	50/cs
T60C	14	50/cs
T62C	18	50/cs

AirLife Cath-N-Glove wallet catheter kits with pop-up basin

Catheter and basin T160C

Tri-Flo suction kit with nitrile gloves 4864T

Sterile suction kits include a Tri-Flo suction catheter, a pop-up solution basin and two sturdy, precuffed blue nitrile exam gloves in an inner wallet. Kits with 5/6, 8 and 10 Fr catheters feature catheters with depth markings.

Cat. no.	Description	Qty.
4863T	5/6 w/depth markings	100/cs
4867T	8 w/depth markings	100/cs
4865T	10 w/depth markings	100/cs
4868T	12	100/cs
4864T	14	100/cs

Tracheostomy care kits

Tracheostomy care kit 4681A

Sterile single use cleaning trays are designed for care of the tracheostomy patient. Choose from kits with or without gloves. Overwrap trays include:

- Three rigid basins for cleaning, soaking and rinsing
- Presewn trach dressing
- Three gauze sponges
- Three pipe cleaners
- Cleaning brush
- Three cotton-tipped applicators
- Twill tape, 32"
- Plastic forceps
- Water-resistant drape
- Hospital wrap

Cat. no.	Additional components	Qty.
4681A	Two vinyl gloves	20 trays/cs
4682A	Without gloves	20 trays/cs

Tracheostomy care kit 3T3030A

Tracheostomy care kit 3T4691

Tracheostomy care kit 3T4691A

Tracheostomy care kit 3T4692

Tracheostomy care kits are packaged sterile in a tray with a coated paper lid. All kits include:

- Trach gauze dressing
- Twill tape, 34"
- Trach brush
- Four gauze sponges, 4 x 4"

Cat. no.	Additional components	Qty.
3T3030A	2 cotton-tipped applicators, 3 pipe cleaners	30/cs
3T4691	2 cotton-tipped applicators, 2 pipe cleaners, 1 pair vinyl gloves, towel	20/cs
3T4691A	2 cotton-tipped applicators, 3 pipe cleaners, 1 pair vinyl gloves, 1 water-resistant towel	30/cs
3T4692	3 cotton-tipped applicators, 3 pipe cleaners, 1 pair vinyl gloves, 2 packets hydrogen peroxide, 30 mL, 1 trach pad	30/cs

Modudose™ Unit Dose Solutions

Left to right - 5262 15 mL 0.9% saline, AL7023 3 mL sterile water

These unit dose solutions contain sterile water, normal saline (0.9% sodium chloride) or half-normal saline solution (0.45% sodium chloride) and have twist-and-pull-off tops for easy opening. The vials feature graduations in 0.5 mL increments and dispense by the drop, the milliliter or as a stream. Their tapered tip facilitates use with various respiratory therapy and tracheal suction systems.

Cat. no.	Vial size (mL)	Qty.
AL7023	Sterile water 3 mL blue vial	1000/cs
AL7025	Sterile water 5 mL blue vial	1000/cs
5251	0.9% normal saline 3 mL pink vial	1000/cs
5257	0.9% normal saline 5 mL pink vial	1000/cs
5262	0.9% normal saline 15 mL pink vial	144/cs

AirLife™ sterile solutions

Left - sterile water 4872B, right - sterile 0.9% saline solution 4873A

For your suction procedure needs, each peel-back foil lid cup contains 4 oz (120 mL) of sterile water or 0.9% normal saline solution. Packaged sterile.

Cat. no.	Description	Qty.
4872B	Sterile water	48/cs
4873A	Normal saline solution, sterile	48/cs

AirLife tracheostomy tube holders

Tracheostomy tube holder RES240A

Our holders include hook-and-loop fastener tabs. For single patient use. There are 10 holders per box and 10 boxes per case.

Cat. no.	Additional components	Qty.
RES240A	Adult	100/cs
RES242A	Neonate and infant	100/cs
